firezone

SIMPLIFIED PARTY WALL SYSTEM

About Firezone

Firezone has been designed to simplify the construction process, from the ease of estimation due to the supply option, to eliminating many accessories to save on site damages and theft.

Firezone is leading the way in simplifying the traditional partywall. No more mould, no more weather damages. Firezone is fast becoming the go to for party walls with builders looking for savings in time and costs.

The Advantages

- Save time with installation
- Save costs by eliminating multiple accessories
- Simplified installation, no specialist trades
- Mould, moisture and impact resistant saving on rectification and wastage.
- Simplified supply offer saving on estimation

Firezone Dimensions

Width: 600mm
 Length: 2700mm
 Thickness: 22mm
 Edge Type: Shiplap
 Colour: Pink

Firezone has been tested by NATA accredited labs to achieve a minimum of FRL60/60/60. Firezone has been certified with CodeMark to show compliance.

Firezone Applications

Firezone can be used when a fire rated separation wall is required.

- Townhouses
- Multi residential
- Dual Lockup
