floorplex

STRUCTURAL FLOORING PANELS

About Floorplex

Floorplex has been designed to simplify the installation process of the traditional wet area flooring.

Being lighter than traditional panels while not compromising in strength, Floorplex is the new generation of sub flooring in wet areas and balconies.

Floorplex can save you time and costs with no need for expensive cutting blades as well as the option to gun nail or screw.

The Advantages

- Save time with installation
- Save costs by eliminating expensive cutting blades and tools
- Gun nail or screw options
- Lighter than traditional wet area panels
- One board for internal or external

Floorplex Dimensions

Width: 600mm
 Length: 2700mm
 Thickness: 19mm
 Edge Type: Tongue & Groove
 Colour: Blue

Floorplex has been tested by NATA accredited labs to achieve loads as specified in AS1170.1 table 3.1 (refer to install guide for further info.)

Floorplex Applications

Floorplex can be used in numerous applications throughout a build.

- Bathrooms
- Laundries
- Kitchens
- Wet areas
- Balconies
- Roof tops
- General sub floors
