## ZERO ALLOTMENT BOUNDARY WALL

### About Zerobound

Zerobound was developed to simplify the construction process, by eliminating numerous processes and expensive products.

Zerobound innovative system, makes it one of the smallest footprint in the market, saving valuable floorspace which can be added back into the overall dimensions of the house.

Why give away valuable space, cost and time, when you can use Zerobound instead.

### The Advantages

- Save time with installation
- Save costs by eliminating multiple components
- Simplified installation, no specialist trades
- Minimal footprint, saving valuable land and house space.
- Simplified supply offer saving on estimation and ordering time.

#### Zerobound Dimensions

Width: 600mm  
 Length: 2700mm  
 Thickness: 14mm  
 Edge Type: Shiplap  
 Colour: Pink

Zerobound has been tested by NATA accredited labs to achieve a minimum of FRL60/60/60. Zeroboundn has been certified with CodeMark to show compliance.
